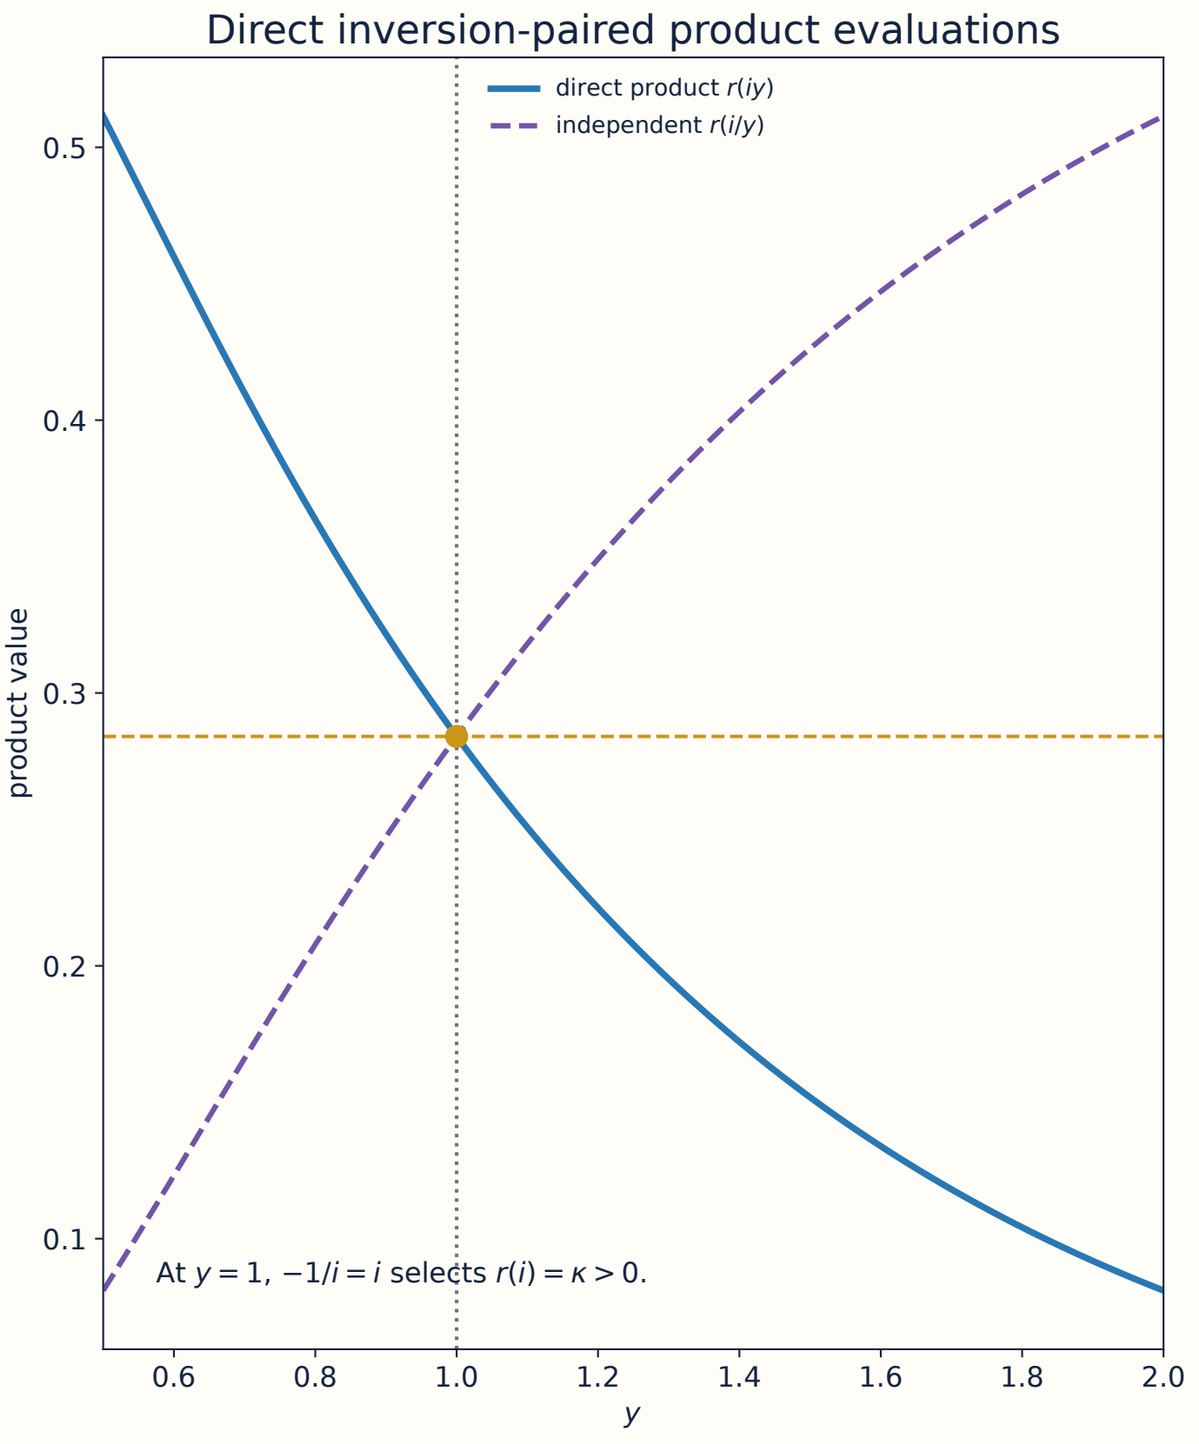
$R(z) = (\gamma - z)/(1 + \gamma z)$
$R(z)$
$z$
positive fixed point $\kappa$
$R(z)$
$z$



Direct inversion-paired product evaluations
direct product $r(iy)$
independent $r(i/y)$
At $y = 1$, $-1/i = i$ selects $r(i) = \kappa > 0$.
product value
$y$
